**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 8-11, 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Wasserbauer et al (US 6618414).

Wasserbauer et al teaches a method of making VCSEL device by forming ohmic contact layer "118" adjacent to the optical cavity "116"; forming mesa in plurality of layers forming oxidizing the oxide aperture layer to form oxide aperture "140" (see col.5, lines 55-60); forming delta doper upper cladding layer; "13, spacer layer "160", which is formed on contact layer "116. Wasserbauer et al forms contact layer on optical cavity (see figures 2-6 and related description). Wasserbauer et al teaches forming several oxide aperture layer, which include above optical cavity.

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-11, 15-17 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art neither teach nor suggest forming dielectric rephrase layer over said p-type contact layer, depositing a photo resist over said dielectric layer rephrase layer and patterning said photo resist to provide a circular puck of rephrase material within said reparse layer and simultaneously define an annular via in said dielectric spacer layer

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
